

## **U.S.-France Cooperative Program**

Under the U.S.-France Cooperative Program in Oceanography, the Director of the Northeast Fisheries Science Center serves as the U.S. Program Leader for the Living Resources Panel. French and U.S. scientists have collaborated on various projects including: (1) Technological Interactions in Multi-Species Fisheries; (2) Age Composition of Fisheries Catch; (3) Genetic Manipulation: Shellfish and Marine Invertebrates; (4) COADS (Comprehensive Ocean-Atmosphere Data Set) Data Bank for Fisheries; (5) CEOS (Climate and Eastern Ocean Systems); (6) Spatio-temporal Scales in the Dynamics of Exploited Populations; and (7) Automated Image Processing Techniques for Classification and Assessment of Living Resources.

### **NOAA Fisheries Contact**
